OBJECTIVE

I am a dedicated and experienced software engineer with over six years of professional expertise. My passion for technology drives me to continually enhance my skills, stay abreast of industry developments, and explore innovative tools. Over the years, I have specialized in developing mobile applications and crafting scripts in various languages. My past freelance and curreny employee work has led me to collaborate with diverse companies and individual clients, often in remote settings. I pride myself on being a resourceful and proactive team player, consistently contributing fresh ideas and effectively managing projects from their inception to their successful deployment. My adaptable approach allows me to seamlessly integrate into diverse work environments, facilitating continuous learning and the practical enhancement of my skills, thereby benefiting the organizations I serve.

Trinity College

EXPERIENCE

Senior Mobile Engineer | Team-Lead
2023 — Present

Crispy Bacon — Milano

At Cripsy, I specialize in creating mobile applications using Cross-Platform Flutter and native iOS and Android development for a diverse range of clients. This includes major financial institutions, insurance companies, and other private enterprises. In addition to development, I play a crucial role in project evaluation, organizational and economic assessments, team leadership, task management, knowledge sharing, and providing support to junior to mid-level colleagues.
